6th European Seminar on Precision Optics Manufacturing, April 09th – 10th 2019
Deggendorf Institute of Technology
Technology Campus Teisnach, Germany

Main topics

- **Manufacturing and measurement** of optics from sub millimeter to large and giant dimensions and optical systems:
Processes for grinding, polishing, centering, assembly, handling, surface modification, cleaning and coating of optics. Standards in optics manufacturing. Design of optics, error budgeting, cost-planning.
- **Advanced and next generation (future) technologies** in high precision manufacturing:
Ultraprecision machining, kinetic abrasive polishing, additive manufacturing, molding, new and special materials, next generation of giant optics manufacturing and testing...
- **Smart manufacturing, internet and internet of things** in the production of optics:
Block chain and distributed-ledger-technology: Data, expert systems, optical designs and process parameters with regard to their integrity and security Process stability, data mining, handling and analysis, control of environment and media...
- **Presentation of current PhD work** in the area of optics development, design and manufacturing

Conference language:

English

We are looking forward to meeting you at the 6th European Seminar on Precision Optics Manufacturing.

Yours sincerely,

Prof. Dr. Peter Sperber
President of Deggendorf
Institute of Technology

Prof. Dr. Rolf Rascher
Head of Technology
Campus Teisnach

6th European Seminar on Precision Optics Manufacturing

Registration

Please register before March 27th 2019. The seminar fee is EUR 400, incl. VAT.
